Copy and paste an image of the desired artwork into each of the lens examples below. Orient the image as desired on the custom etched part and ensure that the artwork is within the specified boundaries. This file will be used to reference the desired position of the artwork on each lens. Save this completed form and send it with the original image file with your order to Elkhart Brass.

Left Shoulder Lens

Right Shoulder Lens

Custom Lens Etching Guidelines

Customer supplied artwork must meet the following requirements to ensure a high-quality image once illuminated in the CobraMax assembly.

- **Image must be original digital artwork in a valid format**

The image provided must be a digital file. The image provided must be a jpg, jpeg, png, or dxf file. Bitmap images must be saved at 300 dpi or higher. Scans or photos of logos or patches are not acceptable.

- **Image must be two-toned.**

The image provided must be two-toned as in 'Black and White', 'Red and Blue', or 'Dark Green and Light Green', etc. The nature of the light module and lenses require that an image be two-toned as the image will show up as either back-lit or not. If an image with more than two tones was used, the image may appear to be washed out, blurred, or partially missing as two or more of the colors would be combined into one, obscuring the overall image.

- **Image must be clearly defined, not shaded.**

Any shading of the image will present a similar issue as that of a three or more toned image. Some of the image will appear blurred, washed out, or missing as the image will be either back-lit or not.

Good Example:

- ✓ Digital Format, Not a Photo
- ✓ Two-Toned Color (Black & White Artwork)
- ✓ Lines Clearly Defined

Bad Example:

- ✗ Areas Shaded, Not Clearly Defined
- ✗ Full Color

DISCLAIMER

If supplying artwork, you are acknowledging that you own the rights or have permission to use the artwork provided. You indemnify and hold harmless Elkhart Brass Manufacturing Company LLC from any and all liabilities incurred from any third-party trademark or copyright infringement claim. Further, if you incorrectly claim rights to digital artwork, whether inadvertently or intentionally, and the artwork is later required to be removed, the costs of removal and of replacement products will be borne by you (the customer) and not Elkhart Brass Manufacturing Company LLC.
