HERO PIPE

BY ELKHART BRASS

ANY HIGH RISE FIRE. EVERY HEIGHT.

The world's first high-rise
exterior master stream system.

“ I believe the HEROPipe™ system will provide our first responders with a vital and effective tool toward their effort to protect the lives and property of New York City. ”

Deputy Assistant Chief Jack Mooney
Chief of the Fire Academy, FDNY

- » Battle the blaze from the protection of the floor below
- » Operational in minutes
- » Lightweight and easy to transport
- » Works with sill and curtain construction
- » Deploys incorporating current tactics

THE FIRST VIABLE SOLUTION FOR HIGH-RISE FIRES

EPIC

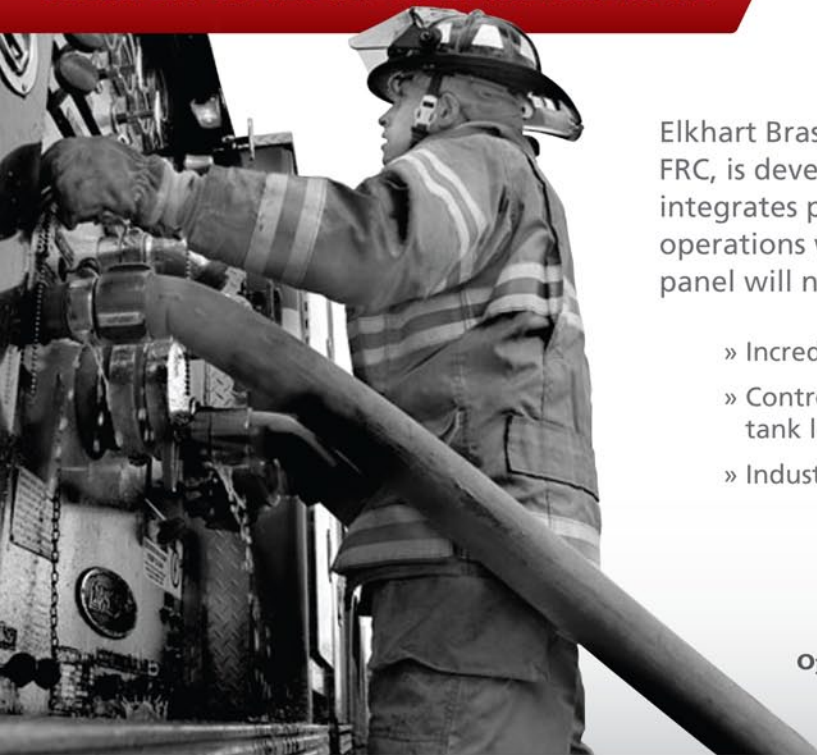

EFFICIENT PERFORMANCE INTUITIVE CONTROL

ONE SMART SOLUTION.

An intuitive integrated control that simplifies numerous components at the pump panel.

YOUR PUMP PANEL WILL NEVER BE THE SAME

Elkhart Brass, in cooperation with the engine governor experts, FRC, is developing a new apparatus control technology that integrates pump control into a single interface. This will simplify operations while also optimizing apparatus space. Your pump panel will never be the same.

- » Incredibly intuitive display
- » Controls valves, pressure, flow rate, engine RPM, tank level and engine governor
- » Industry leading technology at a competitive price

SINGLE BODY. FULL LINE.

Elkhart Brass is now your complete apparatus valve solution.

The addition of our 1" and 1½" single body apparatus valves complete the line. Featuring Elkhart's Unibody ball and seat technology, and brass construction and available with a direct or remote integral actuator.

- » Reliable, easy to install & use
- » Industry standard dimensions
- » Dual self-adjusting seats provide bidirectional sealing

COUPLED WITH THE UNIBODY VALVE OFFERINGS,
ELKHART IS A TOTAL APPARATUS VALVE SOLUTION

TOUGH WORK. EASY OPERATION.

Make a potentially difficult process easier with this patented tank fill adapter.

This tank fill adapter includes Elkhart Brass's #114 drain valve to relieve pressure and allow for easier hose disconnection.

- » Save time and energy during critical tanker operations
- » Available in three STORZ fitting sizes
- » Aluminum – Teflon hard coated

AVAILABLE IN 3" 4" AND 5"

TOUGH BRASS

The Copperhead RF is compact, rugged, and operates wirelessly. It's the right tool for the job.

- » Operates from a quarter mile away
- » Requires just 16" of clearance
- » Most compact device in it's class
- » Smart solution for fireboats and corrosion-prone environments

OPTIMIZED FOR 1250 GPM FLOW RANGE
MOST FLOW EFFICIENT PRODUCT AVAILABLE

ELKHART'S INDUSTRY-LEADING TECHNOLOGY GETS A NEW POWERFUL ADDITION

More power with less water. Elkhart's Industry-Leading EXM Series Sidewinder takes UHP to a whole new level.

Being the recognized industry leader in ultra-high pressure (UHP) technology is gaining attention. The new 7161 Sidewinder EXM UHP is designed to meet U.S. Military standards and is now being offered for other applications as well.

DEVELOPED TO MEET THE STANDARDS
OF THE UNITED STATES MILITARY

1500 PSI

ELECTRIC REMOTE CONTROLLED MONITOR SYSTEMS

Combining modern technology with years of worldwide experience, Elkhart's industrial systems provide fire protection in many hazardous applications and extreme environments including:

Refineries • Chemical plants • Offshore platforms • Loading docks
Nuclear plants • Railroad yards • Sport arenas
